

AsdeqDocs

About AsdeqDocs

The AsdeqDocs Solution:

- Allows a mobile user to directly access any corporate documents, regardless of where or how those documents may be stored
- Directly integrates to some 18+ corporate document repositories;
- Provides native mobile clients for the iPad, iPhone, Android Tablet, Android Phone, macOS and Windows
- Provides a rich and powerful end user experience that allows for a user to
 - browse and view documents
 - work both online and offline
 - search for text within documents (both on device and across multiple document repositories)
 - edit/annotate documents
 - accurately view MS Office Documents
- Supports unprecedented mobile document security including
 - enforcement of changes to document permissions (only have what you are supposed to)
 - on device custom encryption (secure container)
 - full on device auditing of user document access
